Quality made by Haaga

Haaga Sweeping Systems, situated in Germany, southeast of Stuttgart, is a global company that is a pioneer in its field for well over 40 years. Haaga's main expertise is the development of modern and highpower sweeping machines. Products are developed and manufactured exclusively

in Germany to ensure top quality. Haaga place a high value on environmentally friendly and CO2-neutral production. Accordingly, to keep the travel and distribution distances to a minimum, Haaga work with a selected network of local suppliers.

Large areas

Home and garden

Haaga. The clean choice

haaga 600 series

for the most heavy-duty jobs in commercial areas
e.g. property management, cleaning companies
Perfect cleanliness and easy to operate thanks to the electric brush drive.

No pushing – just steering

- > with the Turbo cleaning system
- > extremely manoeuvrable thanks to the electric brush drive
- > also designed to be used hand-powered with an empty battery
- > performance: 3,800 m²/h or 4,100 m²/h
- > weight: 20 kg or 25 kg
- > container volume: 50 l
- > with all features that characterize Haaga sweepers
- > haaga 697 additionally with automatic height adjustment
- > *4 year warranty on all brushes
- > Running time: up to 90 min., charging time: approx. 7 hours

Standard: Professional Line features

- dirt-protected gears
- ergonomic handle
- very little dust thanks to flexible seals

haaga 400 + 600 series

except haaga 250

This is how Haaga sweepers earn their special distinction

1. The one-of-a-kind disc brush system from Haaga > 2.., 4.., 6..

Unlike other sweeping devices haaga rely on their patented disk brush technology. These two specially-made, opposing circular brushes cut under the waste material and whisk it directly into the waste container. The coarse or fine debris is not "run over" or pushed around in front of the sweeper. Even wet leaves are neatly collected.

2. Twice the sweeping capability with Haaga's Turbo sweeping system > 4.., 6..

In addition to the disc brush system, haaga's 400 and 600 series machines have an additional fine-particle roller brush that is mounted behind it. This allows these machines to effectively sweep twice with one pass. Even the most fine debris is collected.

3. Very low dust thanks to an intelligent airflow > 4.., 6..

All of the 400 and 600 series machines (except for the haaga 475) are equipped with two special fine particle filters. The dusty air is cleaned by these filters inside of the machine and then returned to the sweeping circuit.

4. Four year wear guarantee on the brushes > 2.., 4.., 6..

Haaga's guarantee of four years is unmatched in this industry and ensures you the full sweeping performance of your sweeper for a very long time.

* domestic use only

The unbeatable characteristics of Haaga sweepers become apparent as soon as these machines are in action.

1. Effortlessly sweep up fine and coarse dirt (from sand to beverage cans) – be it dry or wet.

2. Sweep up wet leaves as well, which is especially difficult

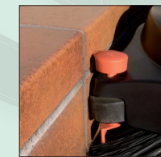

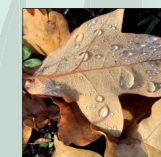

3. The disc brushes, which protrude on both sides ensure even greater sweeping performance

4. Pleasant, easy running thanks to the belt-less drive, which also ensures a long service life

5. Additional guide rollers for easy sweeping along curbs and walls

6. The infinitely variable brush height adjustment ensures optimal cleaning performance on various types of surfaces

7. Space-saving storage, without losing any of the collected material

*Domestic use, 4 year brush wear warranty, 2 years on complete sweeper, except Haaga 250

*Haaga 250, Domestic use 12 months on complete sweeper, Commercial 6 months on complete sweeper

*Commercial 12 months on complete sweeper including brushes, except Haaga 250, 6 months on complete sweeper

*Note terms and conditions apply
